

## Prof. Marta Serrano García

MsD on Mechanical engineering in 1991 by ICAI in Madrid and PhD on Engineering by Politechnical University of Madrid in 2007

25 years of experience At CIEMAT (Spain) on the study of degradation mechanism of structural materials operating under extreme environments, in particular on the determination of mechanical properties

- Head of the Division of Materials of Energy Interest at the Department of Technology. The Division has a recognised position at national and international level: coordination of 4 H2020/EURATOM projects, coordination of the EERA Join Program of Nuclear Materials and relevant participation on OECD NEA and IAEA working groups.
- Marta Serrano is the coordinator of the H2020/EURATOM project ENTENTE, of the Materials Group on the Spanish Nuclear Fission Energy Technology Platform and of the Materials for Energy group of the Advanced Materials and Nanomaterials Spanish Technological Platform.
- She is also an active member of the ISO and ASTM standardization committees.
