

Antonio Vaya Soler is a manager at LucidCatalyst, where he provides strategic advice to large energy users on nuclear deployment and supports their investment decisions. Prior to this role, Antonio worked as an advisor for six years at the OECD/NEA, focusing on nuclear development strategies and economic analysis for member countries. Before joining the OECD/NEA, Antonio served as a lead project engineer at Framatome. He holds a Master's degree in Nuclear Engineering from Supélec and Universidad Politecnica de Valencia, and an MBA from Université de la Sorbonne in France.
